

Business Requirements Document (BRD)

Application Name: Maverick Execution Platform

Training Management System (TMS)

Version: 1.0

1. Purpose

The purpose of this document is to define the **business, functional, and non-functional requirements** for the **Maverick Execution Platform – Training Management System (TMS)**.

The system will serve as a **centralized execution and governance platform** for managing the complete training lifecycle—from batch creation and candidate onboarding to attendance tracking, assessments, trainer coordination, feedback, dashboards, and reporting.

This BRD establishes a **shared understanding and formal agreement** between business stakeholders and the implementation team, and will act as the baseline for design, development, testing, and deployment.

2. Business Objectives

The key business objectives of the Maverick Execution Platform are to:

- Centralize training batch, candidate, and trainer management
 - Replace manual spreadsheets with system-driven execution
 - Automate attendance and assessment tracking
 - Enforce operational discipline through alerts, reminders, and cut-offs
 - Provide real-time visibility into training execution and outcomes
 - Enable data-driven decisions through dashboards and reports
 - Reduce manual follow-ups and coordination effort
-

3. Scope

3.1 In-Scope

- Training batch lifecycle management

- Candidate onboarding and batch assignment
 - Daily attendance tracking and monitoring
 - Assessment score management (Excel-based uploads)
 - Trainer and Training Coordinator role management
 - Notification and reminder automation
 - Dashboards and analytical metrics
 - Feedback initiation, collection, and reporting
 - Topper identification and reporting
-

3.2 Out-of-Scope

- Learning content delivery (LMS functionality)
 - Live proctoring or online test execution
 - Payroll, HRMS, or stipend tracking
 - External certification voucher management
-

4. User Roles & Responsibilities

4.1 Trainer

Trainers are responsible for training delivery and daily execution inputs.

Responsibilities include:

- Upload daily attendance (manual entry or Excel upload)
 - Upload sprint review assessment scores
 - Upload API and coding assessment scores
 - Upload project evaluation scores and files
 - Upload assessment-related documents and evidence
-

4.2 Training Coordinator

Training Coordinators oversee batch execution and governance.

Responsibilities include:

- Create, update, and close training batches
 - Define batch schedules (training dates, timings, assessment dates)
 - Upload candidate master data via Excel
 - Upload coding/assessment question files
 - Add and manage trainer profiles
 - Monitor batch performance via dashboards
 - Trigger feedback emails to candidates
 - Download attendance, assessment, feedback, topper, and consolidated reports
-

4.3 Admin

Admins manage system-level controls and governance.

Responsibilities include:

- Create and manage users and roles
 - Add Trainers, Training Coordinators, and Admins
 - Configure system-level settings
 - Configure topper criteria and thresholds
-

5. Functional Requirements

5.1 Training Batch Management

The system shall allow Training Coordinators to:

- Create new training batches
- Edit batch details (schedule, assessment dates, trainers)
- Upload and map candidate details via Excel
- Assign one or more trainers to a batch

Each batch must have:

- **A unique Batch ID**
- A clearly defined lifecycle status:

- Planned
- Running
- Completed
- Closed

Batch status transitions shall be controlled and auditable.

5.2 Attendance Tracker

Trainers must upload attendance for **running batches** on a daily basis.

Attendance Upload Modes

- Manual entry via UI
- Excel file upload

Business Rules & Validations

- Attendance must be submitted **before 10:00 AM** (configurable)
- System validates:
 - Duplicate entries
 - Missing candidate IDs
 - Invalid batch mappings

Alert Rules

- If attendance is not uploaded by 10:00 AM:
 - An automated email alert is sent to the Training Coordinator
- If a candidate is absent for **3 consecutive days**:
 - Alert is sent to the Training Coordinator for follow-up

All attendance records shall be versioned and auditable.

5.3 Assessment Score Tracker

The system shall support structured assessment tracking.

Assessment Setup

- Training Coordinators define:

- Assessment types
- Assessment schedules
- Excel templates

Assessment Upload

- Trainers upload:
 - Sprint review assessment scores
 - API and coding assessment scores
 - Project evaluation scores
- File format: Excel
- Scores are automatically mapped to candidates and batches

Validation includes:

- Candidate existence
 - Score ranges
 - Duplicate uploads
-

5.4 Notifications & Alerts

The system shall support automated notifications via **Email (mandatory channel)**.

Notification Events

- Attendance not submitted before cut-off time
- Continuous absence (3 days)
- Successful upload of attendance or assessment scores
- Upcoming assessment date reminders to candidates
- Feedback request notifications

All notifications shall be logged with timestamp and recipient details.

5.5 Feedback Management

Training Coordinators shall be able to:

- Trigger feedback collection emails for a batch

- Define feedback windows and closure timelines

Feedback Scope

- Training content quality
- Trainer effectiveness

Feedback responses are:

- Stored batch-wise
 - Available for download and analysis
 - Included in consolidated batch reports
-

5.6 Dashboards & Metrics**Training Coordinator Dashboard**

High-level indicators:

- Total candidates
- Discontinued candidates
- Not-cleared candidates
- Offered / onboarded candidates
- Remaining candidates in training

Operational Metrics (ILT & Analytics)

- Attendance percentage per batch
- Assessment clearance rate
- Trainer-wise performance metrics
- Batch-wise comparison across programs

Dashboards must display near real-time data.

5.7 Reports & Downloads

The system shall support generation and download of:

- Batch-wise attendance reports
- Assessment score reports

- Topper list per batch
- Overall topper list across batches
- Consolidated batch report with filters:
 - Discontinued
 - Not cleared
 - Offered / onboarded candidates

Export Formats

- Excel
 - PDF
-

5.8 Topper Identification

The system shall automatically identify toppers based on configurable criteria.

Topper Criteria

- Overall assessment scores
- Project evaluation scores
- Weightages configurable by Admin

Topper logic must be transparent and reproducible.

6. Non-Functional Requirements

6.1 Security

- Role-Based Access Control (RBAC)
 - Access restricted by role and batch
 - Trainer access limited to assigned batches only
-

6.2 Performance

- Excel uploads supporting up to **20,000 records**
 - Dashboard load time < **5 seconds**
-

6.3 Availability

- System uptime of **99.5%**

6.4 Audit & Logging

- Log all file uploads
- Track attendance and score modifications
- Maintain notification dispatch logs
- Capture batch status and configuration changes

7. Assumptions

- Candidate email IDs are present in uploaded Excel files
- Attendance cut-off time (10:00 AM) is configurable
- Email server and SMTP configurations are available
- Trainers and Coordinators are trained on Excel templates

8. Risks & Mitigation

Risk	Mitigation
Missed attendance uploads	Automated alerts and escalation
Incorrect Excel uploads	Template validation and error reports
Manual follow-ups	System-driven reminders and dashboards

9. Acceptance Criteria

- Training Coordinator can manage full batch lifecycle
- Attendance alerts and absence notifications trigger correctly
- Assessment uploads map accurately to candidates
- Dashboards reflect near real-time data
- Reports download correctly with defined filters

✓ Outcome

The **Maverick Execution Platform** will enable a **disciplined, transparent, and scalable training execution framework**, significantly reducing manual effort while improving visibility, accountability, and reporting for all stakeholders.
